* Volatility is based upon the guidelines established by the Investment Funds Institute of Canada, which are themselves based primarily upon the variability of a mutual fund's returns.

** The distribution rates indicated are estimated annualized rates. The distribution payments can be made on an annual, quarterly or monthly basis. The rates and payment frequency of the distributions may change without notice. The total estimated distributions percentage is calculated using the distribution rate and the ETF weight in the portfolio. The indicated rates of return are based on the historical annual compounded total returns including changes in securities value and payment of all dividends and do not take into account transaction fees or income taxes payable by any security holder that would have reduced returns. Management fees and expenses may be associated with investments in ETFs. Please read the prospectus of each ETF before investing. The funds are not guaranteed, their values change frequently and past performance may not be repeated. All information presented is compiled from sources we believed to be reliable and current, but accuracy cannot be guaranteed. Information in this document should not be construed as recommendations of any specific security nor specific investment advice. Data on September 30, 2018

All information presented is compiled from sources we believed to be reliable and current, but accuracy cannot be guaranteed. Information in this document should not be construed as recommendations of any specific security nor specific investment advice.

The following assumptions were used to calculate the returns of a \$50,000 model portfolio invested on March 1st, 2016 (no additional contributions are deemed to have occurred).

The rebalancing is deemed to have been made each month if the relative deviation of one or more Exchange-Traded Funds ("ETF") was over or under 10% depending on the market close price on the 22nd of each month. Dividends are considered to have been paid at the end of the month. The rebalancing fees are 0.73% annually for the portfolio and are considered to be charged monthly when calculating the performance of the portfolio.
